

NON-ACTIVATED SYSTEM

If you purchased a vehicle but did not activate the KARR Security system at the time of purchase, you can still verify you have the system and if desired perform a firmware update.

Firmware Update

www.KARRsecurity.com

Follow these simple steps to perform your firmware update:

1. Download the KARR Security App.
2. Go to your vehicle and sit at the driver's side of the vehicle.
3. Open the KARR Security App and tap the "Customer Service: 800-395-5277" call link at the bottom of the App.
4. Follow the in-app instructions to check your VIN and perform the firmware update.
5. If your device is already on the latest firmware, a prompt will let you know you're finished.
6. Once completed no further action is necessary.
